

**The Villas of Asbury  
Homeowners Association Inc.  
Storm Door Policy**

It is the intention of the Architectural Change and Covenant Compliance Committee to set guidelines for storm doors and/or patio doors that will keep consistency within the development phases, enhance the property values, and serve the betterment of our community.

It is the mission and charter of the committee to achieve voluntary compliance, and when necessary, to enforce the guidelines in the governing documents of the community. Home owners who wish to add a storm door to the property must submit an Architectural Change Request form to the managing agent prior to installing the storm door. Acceptance of the request will be determined by the committee who will recommend approval by the Board of Directors.

To assure community aesthetics and protect the investment of all Asbury Villas home owners, the committee provides these guidelines which must be followed to have the Architectural Change Request approved:

Color:	Neutral (Almond, Beige, or White)
Style:	Aluminum, 100% Full View, or Self –storing 100% Full View
Hardware colors:	Silver (chrome, pewter) Gold (brass)
